The New York Knowledge Engineering Meetup is a Meetup that aims to bring together the community of software professionals, researchers, and enthusiasts, interested in how topics such as Artificial Intelligence, Knowledge Representation and Reasoning, Machine Learning, and Natural Language Processing fit together in the engineering of intelligent software system applications that acquire, exploit, or create knowledge.

We seek to create a friendly yet stimulating environment for people to network and share knowledge on this topics, through a platform of events and presentations. If you're interested in getting involved sign up and reach out. We look forward to connecting with you.

The ISWC organizers have agreed to open up the posters & demo reception evening to NY Semantic Web and Knowledge Engineering Meetup members.

Date :

21 July 2016 Monday

Venue:

Qwinix Technologies

Horizon, HIEMA Convention Center Road,
Hebbal Industrial Estate 5,
Mysuru, Karnataka 570016
